

COOKIES POLICY

This website uses both its own cookies and third-party cookies to offer visitors an optimal browsing experience and services tailored to each individual's needs and interests.

In accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council of April 27, 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (the "General Data Protection Regulation"), as well as with the relevant national legislation on data protection, all visitors to the website are asked for their consent before cookies are transmitted to their computers.

When you visit our website, no personal data is transmitted to our server unless you actively send us such data. The only exceptions are the technically necessary cookies that are essential for our website's operation. The Google Analytics web analysis tool is configured so that data is recorded only in anonymous form and cannot be traced back to individual persons.

All other technologies from external providers (e.g., Google Maps, YouTube plug-ins) are disabled by default, so no data is transmitted to third parties when you visit our website.

You have the option to accept the use of other cookies in the cookie banner or to enable external content to improve our website's functionality and content. In this case, these third-party providers may obtain your personal data.

What are cookies?

A cookie is a small text file that a website saves on your computer or mobile device when you visit it. Cookies allow the website to remember your actions and preferences (login, language, font size, and other display preferences) over a period of time. As a result, you do not need to re-enter them whenever you return to the website or navigate from one page to another.

Cookies may also contain personal data such as your IP address. Therefore, we store cookies only if you have explicitly permitted this in the cookie settings on our website. You can revoke your consent for the use of cookies at any time, with future effect, by appropriately adjusting your browser's security settings.

The only exception is cookies that are technically essential for the operation of our website. Without them, you cannot visit or navigate the website. Hence, these cookies are generally activated by default.

You can also generally disable cookies in your browser at any time, preventing cookies from being stored on your device. However, please note that completely disabling cookies may lead to malfunctions in the use of our website.

How are cookies used?

There are three common types of cookies:

- **Necessary cookies:** make the website functional by providing basic features such as page navigation and access to secure areas of the website. The website cannot function properly without these cookies.
- **Statistical cookies:** collect and report information anonymously and help website owners understand how visitors interact with the website.

- **Marketing cookies:** used to track visitors as they browse various websites. The purpose is to display relevant and engaging ads for each visitor.

There is also a category of Unclassified Cookies, which are in the process of being classified into one of the above three main categories.

Currently, the domain www.eatoff.app uses three Necessary Cookies.

What are third-party cookies?

Certain sections of website content may be provided through third parties. These third parties may place cookies via another website, and they are referred to as “third-party cookies” because they are not placed by the owner of the respective website. These third-party providers must also comply with the applicable law and the website owner’s privacy policies.

How long do cookies last?

Cookies are managed by web servers. The duration of a cookie can vary significantly, depending on its purpose. Some cookies are used exclusively for a single session (session cookies) and are not retained once the visitor leaves the website, whereas other cookies are retained and reused each time the visitor returns to that website (persistent cookies). However, cookies can be deleted by a visitor at any time via the settings of the browser they use.

How can you control cookies?

You can control and/or delete cookies as you wish—for details, see <https://www.aboutcookies.org>. You can delete all cookies from your computer and set most browsers to block them. If you do this, you may need to manually set some preferences each time you visit the website. Also, some services or options may not function properly.

Below are useful links for controlling cookies depending on the browser you use:

- Cookies in Internet Explorer: <https://support.microsoft.com/en-us/help/17442/windows-internet-explorer-delete-manage-cookies>
- Cookies in Firefox: <https://support.mozilla.org/en-US/kb/enable-and-disable-cookies-website-preferences>
- Cookies in Chrome: <https://support.google.com/chrome/answer/95647?co=GENIE.Platform%3DAndroid&hl=en>
- Cookies in Opera: <https://www.opera.com/help/tutorials/security/privacy/>

Below you can specifically review the cookies used by www.eatoff.app by category:

Result of the “Cookie scan report” generated by the module used—Cookie Serve—on April 07, 2025 for the website www.eatoff.app.
